

POP3 Network or Protocol Error

POP3 Network or Protocol Error

An error has occurred during a POP3 mail download transaction. The details of the error are shown below, and if one is available, a trace showing the communication between Pegasus Mail and the server appears at the foot of this window. If a trace is present, you can copy text from it by selecting it, right-clicking, and choosing 'Copy'.

Hostname: pop.mail.yahoo.com

Name of POP3 profile: Bob's Cox Mail from Yahoo

Description of error: A network error occurred during connection to the host.

Trace showing end of transaction
